Siser Cutter

Simple Sticker Making Guide

1

Open ***Leonardo Design Studio*** and go to the **Design** tab on the bottom left.

2

Configure the **Cutting Mat** settings on the upper left panel.

- Disable page marks
- Enable cutting mat mode
- Use the Standard Siser Mat (12in x 12in)
- Enable Print and Cut job
- Set the page size to US Letter

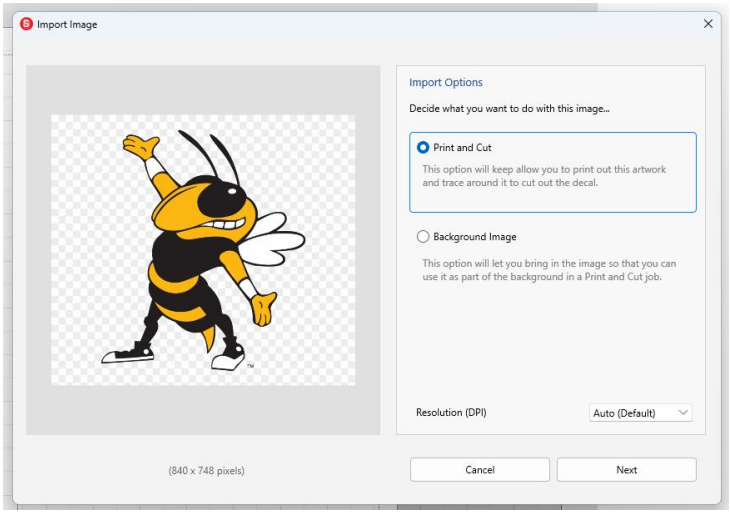

3

Drag and drop your desired sticker files onto the mat in the center of the screen. Generally, .png files with a transparent or white background work best.

THE HIVE MAKERSPACE

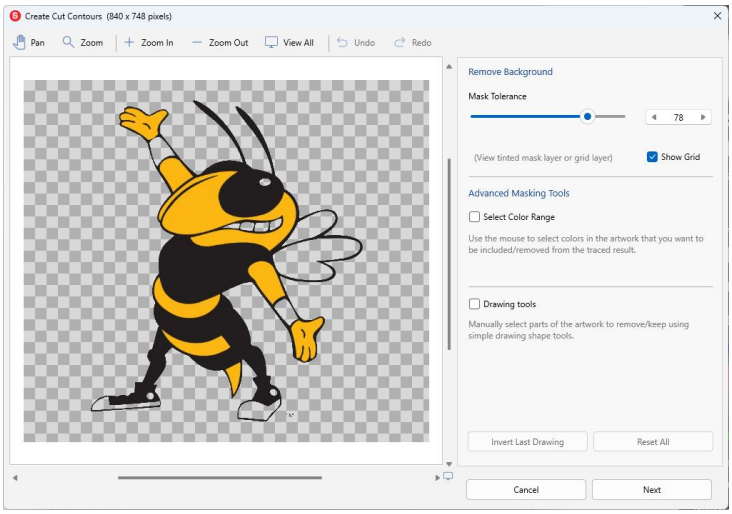

Import the image with the **Print and Cut** option. Proceed to the next menu.

4

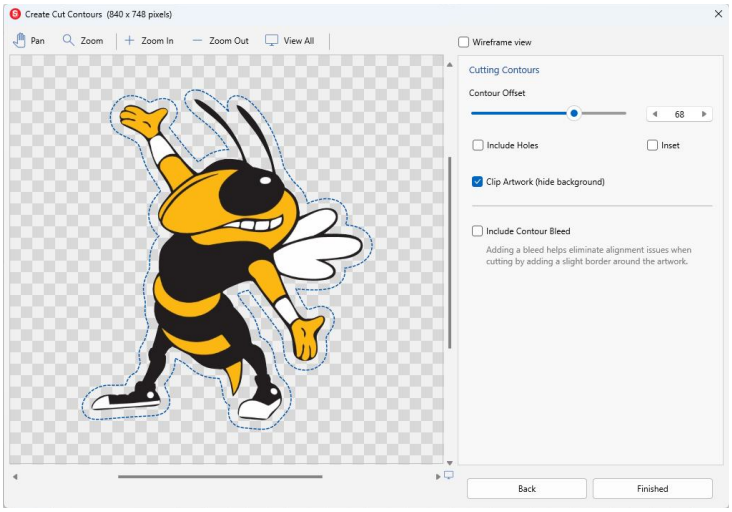

5

Increase the **Mask Tolerance** of your image until the background is no longer visible in the preview. Proceed to the next menu.

Adjust the **Contour Offset** until you have the desired amount of space between your image and the cutting line. If your sticker has inner holes that need to be cut out, enable the **Include Holes** option.

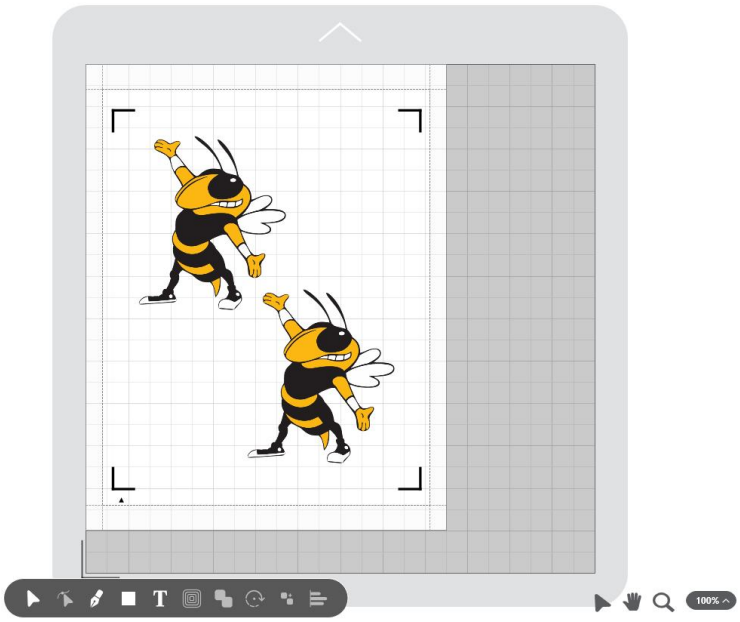

6

THE HIVE MAKERSPACE

7

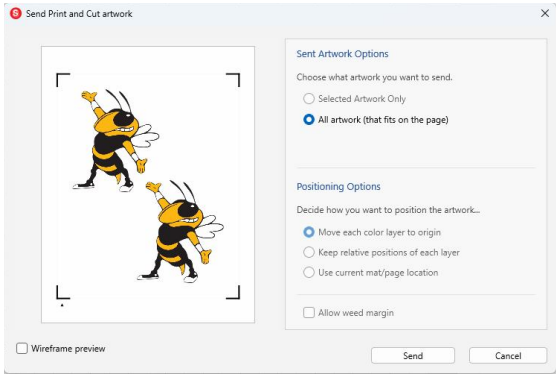

Move, copy, and scale your image as needed.
If the page marks ever turn red, move your stickers away from the edge of the page until they turn black again.

Send the design and ensure that the preview looks correct. Proceed to the next menu with the **Send** option.

8

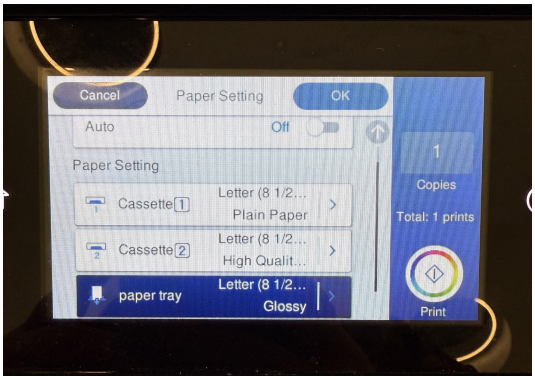

9

Start on the **Print Artwork** tab. Select Printable PDF and save onto a flash drive. Insert this flash drive into the printer and print the PDF, making sure to specify paper type as Glossy and use the **rear** paper tray.

You can get sticker paper from the front desk.

THE HIVE MAKERSPACE

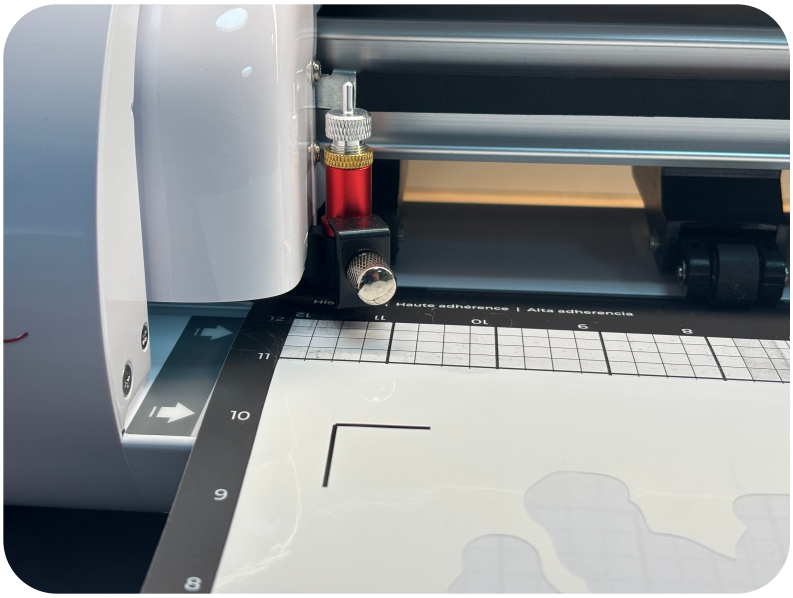

Place your design onto the cutting mat. Position the paper at the bottom left corner of the mat.

10

11

Place the mat into the machine. Ensure it is aligned. The edge of the mat should align with the gray alignment guide on the machine. Load your design into the cutter using the upward arrow on the control screen.

Using the arrows, move the red cutting head to be positioned above the lower left page mark.

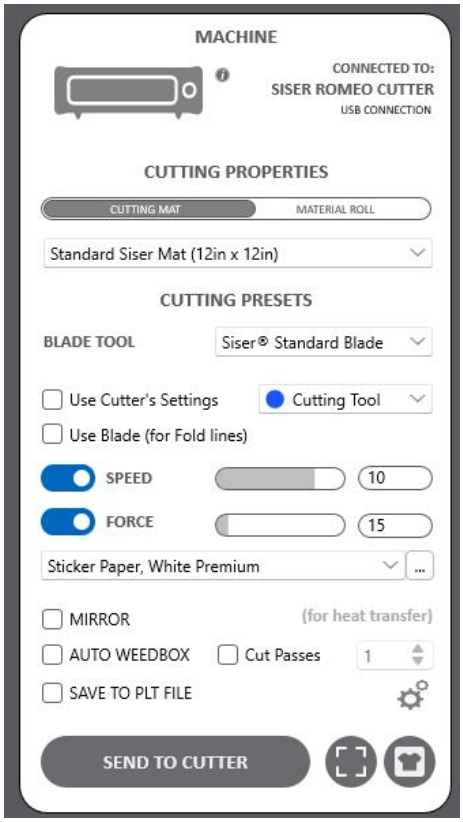

12

13

Proceed to the **Cutting Contours** tab. Select **Sticker Paper, White Premium** as the material. Ensure all other settings are correct. Then, **Send to Cutter**.

14

Watch the cut to ensure it runs properly. After completion, use the control arrows to remove the mat from the cutter. Then, remove the sticker paper and enjoy your new stickers!

15

Cleanup after yourself and leave the space better than you found it.
